

## SOFTPATH CLOUD SERVICES

Challenges with some traditional Data Management Projects:

- Too expensive
- Takes too long
- Delayed ROI

### The Softpath Cloud Solution

Softpath Cloud Services leverage the Informatica Cloud solutions suite to make your data a competitive advantage while saving you time and money.

**Cloud Data Integration:** Integrate data with all applications using custom API's.

**Cloud Connector:** Seamlessly connect applications with point-connect UI interface.

**Cloud Data Quality:** Better data for reporting, forecasting, improving Marketing ROI, improving cross-sales and customer experience. Utilize Address Doctor API's to clean and validate contact data.

**Customer 360 for Salesforce:** Master key data for a 360-degree view of customers. Configurable rules-based logic to consolidate data. Eliminate duplicates and create hierarchies. While merging, decide which records to keep or discard.

### Key Benefits:

Deploying these Cloud solutions results in better decision-making, improved customer experience and more effective up-selling and cross-selling. It's a less invasive process that results in faster implementation and a more immediate ROI.

### HOW SOFTPATH CAN HELP

We offer a comprehensive set of services regardless of where you are in your Data Management journey.

### Data Management Needs Assessment Services:

The Softpath team works with our clients to create a common understanding of the business purpose and value among all stakeholders. Our team represents a range of solutions: Cloud, On-Premise or Hybrid Solutions, to help find the best solution for your business. Our services include:
